TRADITIONAL CLEANING TOOLS

This line of tools are manufactured for industries where hygiene standards are not so strict, due to the nature of the products being manufactured, but require quality tools that can withstand the rough and continuous use demanded by the industry.

Our line of traditional brushing and cleaning tools employs the exclusive use of excellent quality raw materials, in many cases imported, for a long lasting durability and higher performance of our products, thanks to their proven quality.

NEW! Video of use, technical sheet and more information about the product by scanning the QR code.

For a more complete experience, you will now find a QR code on several products in this catalog, which you only need to scan with your mobile device to obtain more information on the product in question.

Symbology:

For a better identification of the right product for your needs, you will find a series of icons representing the specific industry for which the tool is recommended for:

In addition, with a constant concern about reducing the impact to our environment, we have included biodegradable and recycled materials in the development of our products. We add the following icons for better identification:

WOOD BLOCK PUSH BROOMS

Our tropical hardwood block is manufactured with two threaded holes, to fit any threaded handle from our line, and with a wide variety of bristles for multiple applications.

POLYPROPYLENE SALES SALES

CODE	1114	1118	1124
SIZE	14"	18"	24"
PACK	12	12	12

3" stiff red polypropylene bristles, recommended for sweeping coarse dust and for scrubbing.

BROWN POLYPROPYLENE >

11T SERIES

CODE	1118T	1124T
SIZE	18"	24"
PACK	12	12

This is an alternative to our red polypropylene brush but with brown crimped and slightly less stiff polypropylene bristles. These push brooms were developed for general floor sweeping. Even with less scrubbing capability, it can still be used for this purpose.

PALMYRA ~

12 SFRIFS

CODE	1214	1218	1224
SIZE	14"	18"	24"
PACK	12	12	12

3" natural Palmyra bristles are recommended for outdoor sweeping, such as parking lots, where temperatures affect plastic bristles.

PALMYRA 4" -

12-4 SERIES

CÓDIGO	1218-4
MEDIDA	18"
CAJA	12

Manufactured with 4" long Palmyra bristles allowing better sweeping with less physical effort and more durability. It is recommended for sweeping streets and parking lots.

TAMPICO FIBER

13 SERIES

CODE	1314	1318	1324
SIZE	14"	18"	24"
PACK	12	12	12

3" natural Tampico bristles resistant to contact with acid and high temperatures. This brush can be used for a wide variety of applications including sweeping fine dust and applying sealants.

CODE	1318K	1324K
SIZE	18"	24"
PACK	12	12

Black Tampico fiber gives a better general presentation to this brush because of its color it hides dirt very well and offers a better look. It is recommended for sweeping in high traffic areas where a clean presentation is required for both the area and the cleaning tool.

WOOD BLOCK PUSH BROOMS.

Our tropical hardwood block is manufactured with two threaded holes, to fit any threaded handle from our line, and with a wide variety of bristles for multiple applications.

POLYESTER >

1.5 SERIES

CODE	1514	1518	1524
SIZE	14"	18"	24"
PACK	12	12	12

3" polyester bristles (made out of recycled PET) with medium stiffness. This is a low-cost option recommended for general sweeping.

CODE	1814MIX	1818MIX	1824MIX
SIZE	14"	18"	24"
PACK	12	12	12

3" mixed PVC bristles (soft grey around the perimeter and medium brown in the middle) that allow using a single tool to sweep both fine and medium dust. Very useful on polished cement floors in industrial facilities.

PVC >>> 18 SERIRES

CODE	1814	1818	1824
SIZE	14"	18"	24"
PACK	12	12	12

3" soft Italian PVC bristles with flagged tips, for extra softness, provides excellent durability. This brush is recommended for sweeping fine dust and washing delicate surfaces.

CODE	PACK
36111624	12

16" brush, 5.13" (13.03 cm) long, rigid polypropylene fiber bristles. Recommended for use on street crews, construction and demanding work areas. The fibers of this brush are designed for high strength and long durability.

POLYPROPYLENE >

CODE

SIZE

PACK

MIXED

Push broom for fine and semi-fine dust sweeping. The mix of ultra-soft flagged orange bristles at the perimeter and mediumsoft flagged black bristles at the center allows efficiently removing all kinds of dust. Additionally, polypropylene bristles are more resistant to temperature than PVC bristles.

POLYPROPYLENE TRIANGULAR BRUSH >

Brush with 1.13" (2.87 cm) long polypropylene bristles, recommended for general scrubbing.

Its triangular design allows efficient cleaning of baseboards, moldings and floor corners.

POLYPROPYLENE FOAM BLOCK BROOMS.

Our floor brushes, manufactured with highly-resistant polypropylene foam block have two threaded holes, to use with any threaded handle from our line, with a wide variety of bristles for multiple applications.

POLYPROPYLENE 🗻 💆 🌅

11 SERIES

CODE	1114-P	1118-P	1124-P	1136-P
SIZE	14"	18"	24"	36"
PACK	12	12	12	4

3" stiff red polypropylene bristles, recommended for sweeping coarse dust and for scrubbing.

CODE	1214-P	1218-P	1224-P	1236-P
SIZE	14"	18"	24"	36"
PACK	12	12	12	4

3" Palmyra bristles highly recommended for sweeping coarse dust like sand in coastal areas because of the bristles' superior resistance to high temperatures and the block's resistance to humidity.

TAMPICO FIBER

13 SERIES

CODE	1314-P	1318-P	1324-P	1336-P
SIZE	14"	18"	24"	36"
PACK	12	12	12	4

3" Tampico bristles for sweeping fine dust, recommended for outdoors since the bristles are not damaged by high temperatures. Both the block and the bristles of this brush are very resistant to contact with acid.

15 SERIES

CODE	1514-P	1518-P	1524-P	1536-P
SIZE	14"	18"	24"	36"
PACK	12	12	12	4

3" black polyester bristles (made out of recycled PET), recommended for general sweeping.

18 SERIES

CODE	1814-P	1818-P	1824-P	1836-P
SIZE	14"	18"	24"	36"
PACK	12	12	12	4

3" soft Italian PVC bristles with flagged tips. Ideal for sweeping fine dust and washing delicate surfaces since both the block and bristles are not affected by contact with water.

POLYPROPYLENE SA PLOKE

CODE	1818OR-P	1824OR-P	1836OR-P
SIZE	18"	24"	36"
PACK	12	12	4

This broom is manufactured with a mix of two different bristles (very soft orange flagged bristles at the perimeter and soft black flagged bristles at the center) for an excellent performance with fine dusts. The foam block offers more durability in wet environments.

POLYPROPYLENE FOAM BLOCK BROOMS.

Our floor brushes, manufactured with highly-resistant polypropylene foam block has two threaded holes, to use with any threaded handle from our line, with a wide variety of bristles for multiple applications.

HI-LO SCRUB BRUSH 🗫 💆 💆

CODE	PACK
1110-HL	6

10" (25.4 cm) long brush, made of a structural polypropylene block with a 3/4" threaded hole to fix the cane, compatible with any cane with a threaded tip from our line and 1 3/4" yellow rigid polypropylene curly fiber (4.44 cm) in length.

It can be used on surfaces (not in the food industry) such as walls, under furniture, among others, without losing contact angle. The most economical option with respect to our Multisurface brush (1110-M) since it is manufactured with a lower cost black block and does not have fiber on the sides

PVC -MIXED

CODE	PACK
1836MIX-P	4

36" (91.5 cm) long brush, made with a combination of two fibers of different calibers (soft gray on the perimeter and brown with medium stiffness in the center) that allows sweeping fine and medium dust with a single tool. Very useful on concrete floors in industrial facilities.

SPECTRUM®OMNI SWEEP 🛌 🙎 🚉

Brush made of polypropylene bristles and block with a 3/4" threaded hole to fix the cane.

The fibers have an angled cut for fast and effective sweeping on all types of surfaces. Short, stiff fibers at the front sweep up heavy debris. Long, fine/medium fibers on the back sweep up dust and fine particles.

VEHICLE CARE BRUSHES

Brushes specially designed for vehicle care because of the softness of the bristles. These brushes provide the perfect tool for car washing and great durability for daily use. Manufactured with durable polypropylene foam block with threaded handle hole.

1410 MODEL -

CODE	SIZE	PACK
1410	10"	12

2 ⁵/₁₆" soft nylon bristles with flagged tips and 10" foam block with bumper. This brush has a threaded handle hole and a hole for use with tapered tip handles. These brushes may also be used manually.

It is recommended to wash cars and delicate surfaces, due to the softness of the bristles the surfaces will not suffer any damage.

1410-B MODEL ---

CODE	SIZE	PACK
1410-B	10"	2

2 ⁵/₁₆" flagged soft nylon bristles with flagged tips and 10" foam block with a threaded handle hole.

These brushes are recommended to wash cars, trucks, buses and trailer boxes, since the soft nylon bristles do not scratch delicate surfaces. The two level design of the brush allows reaching different surfaces without losing contact angle.

4810 MODEL >

CODE	PACK
4810	6

Brush manufactured with soft flagged PBT bristles and cylindrical structural foam block with three threaded holes to use it on different angles. It is very useful for washing buses and trailer rims.

CODE	PACK
4820	6

Brush manufactured with very soft flagged polystyrene bristles and cylindrical structural foam block with three threaded holes to use it on different angles. It is used to clean delicate surfaces on buses or trailers.

PARTS AND DETAIL BRUSH 🗻 💆

CODE	PACK
3801	6

High durability brush manufactured with round cut PBT bristles and plastic block. It has a flow-thru system that allow liquids to run through the block and out the bristles for detailing.

It can be connected to a degreasing station, this brush is widely used to clean parts in the automotive industry.

VFHICLE CARE BRUSHES

Brushes specially designed for vehicle care because of the softness of the bristles. These brushes provide the perfect tool for car washing and great durability for daily use. Manufactured with durable polypropylene foam block with a threaded handle hole.

(∐ੀਂ⊔≘}ੂੰ 1609 MODEL ➡ 🛣 *(∐ੀਂ⊔≘}ु*ੰ 1809 MODEL ➡ 🛣

PALMYRA SCRUB BRUSH ***

This brush is manufactured with natural Palmyra bristles and hard wood block with one threaded handle hole and another for tapered tip handles. It is used for aggressive scrubbing on boat decks and floors in general. These scrub brushes are 100% biodegradable.

COUNTER DUSTER WITH POLYPROPYLENE 20 3 BRISTLES -

COUNTER DUSTER WITH BLACK TAMPICO BRISTLES,

CODE	PACK
3701	12

All-purpose black crimped polypropylene bristles and tropical hard wood block. Lanyard hole enables hang-hook storage. Recommended for wet and dry use on counters in workshops and many industries (not food industry).

3703 12

Manufactured with tropical hard wood block and black Tampico bristles (100% biodegrable). Lanyard hole enables hang-hook storage. Soft bristles are great for dusting small particles on all surfaces (not food industry).

UTILITY BRUSHES.

Scrub brushes for use in many professional cleaning tasks, manufactured with a highly-durable polypropylene foam block.

TAMPICO FIBER

CODE	HANDLE	SIZE	PACK
3101	SHORT	8 1/2"	12
3101-L	LONG	20"	6

Soft natural Tampico bristles highly resistant to acids and high temperatures, recommended for general washing in less aggressive tasks. These bristles are ideal for applications using very hot water since they are not affected by high temperatures like plastic bristles.

POLYESTER

Low-cost 3" polyester bristles (made out of recycled PET). It is recommended for aggressive scrubbing tasks.

NYLON >

CODE	HANDLE	SIZE	PACK
3104	SHORT	8 1/2"	12
3104-L	LONG	20"	6

Highly-resistant nylon bristles that provide the best resistance to high temperatures compared to any other plastic bristle. It is also gentle on fabrics, making it ideal for cleaning furniture and rugs. Because of its hygienic features it is also used in areas of high contamination risk.

PALMYRA AND WOOD HANDLE UTILITY BRUSH

CODE	HANDLE	SIZE	PACK
3106	SHORT	8 1/2"	12
3106-L	LONG	20"	12

Brushes manufactured with tropical hardwood block and Palmyra bristles. Widely used for cleaning woks in restaurants because of their resistance to high temperatures (woks are commonly washed while they are still hot). Lanyard hole enables hang-hook storage. Available with short and long handle.

TAMPICO FIBER AND WOOD HANDLE UTILITY BRUSH

CODE	HANDLE	SIZE	PACK
3111	SHORT	8 1/2"	12
3111-L	LONG	20"	12

These brushes are manufactured with 100% biodegradable materials. The bristles and the handle are resistant to high temperatures, it is recommended for hot surfaces washing or with hot water (not food industry). Lanyard hole enables hang-hook storage. Available with short and long handle.

BROOMS.

Line of brooms manufactured with polypropylene foam block with two ¾" threaded handle holes one for upright use (traditional) and the other for angular use (providing superior comfort for the user). Suitable for all threaded handles from our line.

CURVED BROOM

	PACK			
8300B	8300G	8300R	8300Y	12

Broom manufactured with flagged PVC bristles for better results when sweeping fine dust. This broom is sold without a handle so the user can have significant savings by using the same handle they already own. It is suitable for the 1901-M or 1905-M handles (Page 17).

POLYESTER BRISTLES ANGLE

CODE	PACK
8302	12

Manufactured with polyester bristles (made out of recycled PET), it is a low-cost option for light-duty applications.

LOBBY BROOM

Broom manufactured with flagged PVC bristles recommended for general sweeping.

DUST MOP HEADS & METAL DUST MOP FRAMES.

Heavy-duty frames are sold in bundles, threaded connector frames and dust mop heads are sold in boxes.

DUST MOP METAL FRAME SALE

CODE	SIZE	PACK
6101	40 cm	12
6102	60 cm	12
6103	90 cm	12
6104	125 cm	6
6105	150 cm	6

Dust mop metal frame manufactured with specifications that make them the most resistant for heavy-duty. The 20 gauge sheet metal handle has a reinforced tip to prevent breakage due to material wearing fatique.

The wire rod used for manufacturing the ring, as well as the steel sheet used in the handle articulation, are more resistant than the ones used by our competitors, making our frames the best available option.

THREADED CONNECTOR DUST MOP FRAMES — Q &

CODE	SIZE	PACK
6101-l	40 cm	12
6102-l	60 cm	12
6103-l	90 cm	12
6104-l	125 cm	12
6105-l	150 cm	12

Alternative to traditional dust mop metal frames, these frames are designed to make the job easier for users and lowering operating costs as both the handle and frame can be replaced separately when necessary. Manufactured with specifications and materials that makes them resistant to continual use in heavy-duty.

These frames can be used with any threaded handle from our line of products.

MICROFIBER MOP =

The microfiber curly finish (known as a loop end in the US) keeps dust off the floor.

Dust sticks to the center of the microfiber mop like a magnet for effective cleaning.

MICROFIBER MOP BASE >

SIZE	CODE	PACK
18"	363351900	12
24"	363352500	12
36"	363353700	12

Base for microfiber made of aluminium. Rugged triple-riveted construction for durability. Designed to clean hard to reach areas and hard surface floors.

Compatible with microfiber and pads for wet or dry cleaning.

CUT END DUST MOPS.

Our dust mop heads design uses long-staple yarn on the edges and short in the middle section, that allows to use less mop oil resulting in lower costs and less pollution to the environment. The high-quality cotton yarn used to make our mop heads makes them long-lasting and more resistant to abrasion.

EXPORT DUST MOP

CODE	SIZE	PACK
6201	16"	12
6202	24"	24
6203	36"	24
6204	50"	12
6205	60"	12

These mop heads are the most durable and the longest-lasting from our line of products. Made with durable 100% cotton heavy-gauge canvas. The best option for cleaning companies and users whose work is constant. The price-durability ratio is the best you will find on the market. (Metal frame sold separately).

PROFESSIONAL DUST MOP

16"	6401W	6401B	12
24"	6402W	6402B	24
36"	6403W	6403B	24
50"	6404W	6404B	12
60"	6405W	6405B	12

Cut end dust mops made with blended cotton yarn, and synthetic non-woven fabric. These dust mops have a very good durability at a very competitive price. This is the most wanted option for dust mops and they have the recognition from our clients along the USA and Latin America. These dust mops are available with white and blue yarn.

RED PROFESSIONAL DUST MOP

SIZE	CODE	PACK
24"	6402R	24
36"	6403R	24

Professional model dust mop made with red dyed cotton yarn, which allows to identify mops by their area and to have a more aesthetic presentation for public areas (colored dust mops are far better at disguising dirt and stains).

Metal bases and poles sold separately

Socket mops are sold in boxes, and the traditional ones are sold in bundles.

YATCH MOPS 🗫 💆

MODEL	500
CODE	8150
Ø HANDLE	7/8"
PACK	12

Used for general-purpose and For industrial use and cleaning. Wet mop manufactured with the semi-industrial facilities.

Recommended for all personnel because of the thread count (14 oz.) and double layer of lacquer has a higher absorption capacity, on the handle (which also protects it from moisture) that makes them easy for the user hands.

MODEL	750
CODE	8175
Ø HANDLE	7/8"
PACK	12

large areas.

It has 50% more filament than the 500 model (21 oz.) and therefore drastically cutting cleaning time.

MODEL	750-E
CODE	8175-E
Ø HANDLE	1 1/8"
PACK	12

same features as the 750 model but with a thicker handle for increased durability and a more comfortable

MODEL	CODE						PACK		
400	8240SB	8240SG	8240SR	8240SW	8240SY	8240SP	8240SO	8240SK	24
500	8250PB	8250PG	8250PR	8250PW	8250PY	8250PP	8250PO	8250PK	24

Socket mop manufactured with a cotton-polyester blended yarn (90% cotton-10% polyester) that provides excellent absorption and durability. The 400 model has 10 oz. of varn and the 500 model has 14 oz. This socket mop provides significant savings because its design allows you to throw away worn-out mop heads and reuse the handles (sold separately) or to continue using the handles you already have to use with brushes and other cleaning tools.

(Wet mop sold separately).

WET FLOOR SIGN

CODE	PACK
9901	10

Bilateral 25" high x 11" wide sign made of polypropylene. Designed with specially contoured legs to minimize the contact of the sign with wet floors. Caution notice printed in 3 different languages.

SPARTA

BUCKET WITH WRINGER

Bucket with wringer for floor cleaning, made of polypropylene and 16.5 liters capacity.

Its size and wringer make it very useful, since it avoids direct contact and wet hands.

YELLOW BUCKET >>>

WRINGER

PIECE	CODE	P/
BUCKET WITH WRINGER	8936Y	

8931Y

38 qtr. mop bucket manufactured with reinforced polypropylene for a long lasting life, even in heavy duty, rubber wheels and metal handle. The side press wringer is more durable due to the upgrade of the lever mechanism. We offer the wringer, wheels and metal spring as replacement parts to extend the products life.

FLOOR SQUEEGEE WITH WOODEN HANDLE >=>

CODE	PACK
7104	12

20" metallic frame floor squeegee with wooden handle manufactured with reinforced metal sheet and flexible natural rubber that allows removing water effectively.

It is important to highlight the features of this product since it has been designed for intensive use in industrial and professional facilities while our competitors' squeegees are made with a very thin metal channel and low-quality rubber (making the product less durable).

FLOOR SQUEEGEE WITH METAL HANDLE

CODE	PACK	
7104-BM	12	

With similar features as our model with a wooden handle, this squeegee are made with an 18 gauge galvanized metal handle (very durable) as wood is not allowed in all industries due to health regulations, or simply because wood would not stand heavyduty applications.

SOCKET FLOOR SQUEEGEE >>>

CODE	PACK	
7104-l	12	

20" squeegee with high-impact polypropylene connector with interior threading (suitable for our threaded handles) and high gauge galvanized metal channel, appropriate for heavy-duty applications.

This squeegee is part of our interchangeable handle system that allows for different tools to be used with the same handle, resulting in significant savings. In addition, when the rubber wears out, you keep the handle and only have to pay for the cost of replacing the squeegee.

PROFESSIONAL WINDOW SQUEEGEE > --

CODE	SIZE	PACK
7201	12"	12
7202	18"	12

Low cost window squeegee with plastic grip for tapered handles, anodized aluminum frame and natural black rubber. Because of its features this tool is ideal for semiprofessional users that need a high quality and low cost tool.

It is available in 2 different sizes: 12" and 18".

SHEET METAL HANDLES

LENGTH	CODE				PACK
48"	1901-MB	1901-MG	1901-MR	1901-MY	24
54"	1905-MB	1905-MG	1905-MR		24

34 caliber sheet metal baton with 3/4" threaded plastic tip, covered with plastic film. This cane is the most economical option in our line of threaded canes. Available in 48" length and 54" m length. Sheet gauge used is much higher than that used by our competitors.

WOODEN HANDLES

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1900	⁷ /8" (2.22 cm)	48"	NO	DNA	24

48" long ⁷/₈" diameter, lacquered-wood handle without threaded tip, recommended for using metal base Moerman squeegees (Page 28).

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1905-SP	¹⁵ / ₁₆ " (2.38 cm)	60"	NO	DNA	24

Handle with the same features as the handle code 1905 except that it does not have a threaded tip, recommended for using metal base Moerman squeegees. (Page 28).

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1901	⁷ /8" (2.22 cm)	48"	WOOD	3/4"	24

48" long 7/8" diameter, lacquered-wood handle with 3/4" threaded tip suitable for our entire line of products with threaded handle hole.

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1904	⁷ /8" (2.22 cm)	48"	METALIC	3/4"	24

48" long 7/8" diameter, lacquered-wood handle with 3/4" threaded metal tip for greater durability, suitable for our entire line of products. Humidity does not affect the threaded tip, making this a long-lasting product.

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1905	¹⁵ / ₁₆ " (2.38 cm)	60"	METALIC	3/4"	24

60" long ¹⁵/₁₆" diameter, lacquered-wood handle with "threaded metal tip, suitable for our entire line of products. Its wider diameter makes it more resistant for heavy-duty. Its length is ideal to avoid the need of bending over to sweep, making the user less prone to fatigue, allowing a better performance and decreasing absenteeism among cleaning personnel.

MODEL	DIAMETER	LENGTH	TIP MATERIAL	Ø THREAD	PACK
1909	⁷ /8" (2.22 cm)	30"	METALIC	3/4"	6

30" long 7/8" diameter lacquered-wood handle with threaded metal tip for greater durability. This handle is specially designed for our lobby broom and is sold separately, allowing significant savings by purchasing only the replacement broom head.

FIBERGLASS HANDLE ... Z Z Z

Line of 3/4" handles tip poles, they are very light, do not conduct electricity and are resistant to exposure to the environment. (Codes 1904-F and 1906-F have a reinforced tip with a steel core).

NATURAL HANDLE ... BARRA

CODE	PACK
1905-A	12

Handle 40 anodized aluminum pole, ¹³/₁₆" (2.06 cm) in diameter by 1.50 m long and with a 3/4" threaded metal tip.

NATURAL ALUMINUM HANDLES

LENGTH	CODE	PACK
48"	1904-AK	12
60"	1906-AK	12

Aluminum handles (natural anodized) of 1" (2.54 cm) in diameter, which provides greater comfort for the user, and 3/4" threaded plastic tip reinforced with a steel core.

STRIPED ALUMINUM HANDLE WITHOUT THREADING 🗫 💆

CODE	PACK
1905-E	12

60" long 1" diameter striped aluminum handle without threaded tip.

Designed for use with Moerman foam rubber squeegee with metal base (Page 28). The striped handle is perfect for continual use in industrial and commercial facilitie.

HEAVY-DUTY TELESCOPIC POLES > CONTROL OF THE PROPERTY OF

CODE	SECTIONS	SIZE	PACK
192240	2 x 48"	7.55 ft	6
192360	2 x 79"	12.47 ft	6

For a more aggressive scrubbing at a lower price, made with durable anodized aluminum and threaded metal tip, it is designed for heavy-duty at heights. These poles are the safest option for cleaning at altitudes as they make it unnecessary to use a ladder. Its storage and transportation are very easy due to its length when retracted, it is also recommended for washing buses and trailers

BRACE RODS

CODE	PACK
1910	12 PAIRS

Galvanized brace rods for use with our 24" and 36" brushes. These braces provide excellent handle support for heavyduty sweeping (all screws necessary for their installations are included).

HANDLE ADAPTER

CODE	PACK
1999	12

This adapter allows usina Pulex and Moerman brand floor squeegees (those without a threaded connection) with all our threaded handles. Designed for its use with Pulex® squeegees and Moerman® squeegees.

(Handle and saueeaee separately).

HANDLE ADAPTER FOR ITALIAN TO 3/4" THREAD 3

Plastic adapter with 3/4" threaded tip. This adapter has an internal perforation for Italian thread, allowing the use of Italian threaded handles in products with 3/4" threaded tip.

(Handle and squeegee solo separately).

HAND HELD PLASTIC DUSTPAN -

Plastic dustpan made of high impact polypropylene. This product has been developed for sweeping fine powders on work tables.

Ideal complement to our Model 3701 and Model 3703 brushes (Page 9).

CODE	PACK
9103	6

Our metal dustpan was designed for picking up large and heavy debris in metalworking industries and has also become popular in other industries because of its durability in heavy-duty applications.

The thickness of the metal used is ideal for heavy duty and makes this dustpan last more than 10 times longer than traditional metal dustpans.

BLACK DUST PRO LOBBY DUSTPAN

CODE	PACK
9102K	6

Dual-system reinforced plastic dustpan: it can be used as a swing-out lobby dustpan or as a fixed dustpan with a stick.

Made of resistant high-impact polypropylene and aluminum pole. It has an accessory to fix the broom to the dustpan pole and thus be able to transport the cleaning tools more easily.

BLACK ALUMINUM BRUSH RACK

CODE	PACK
9110K	6

Manufactured with aluminum covered with electrostatic paint, it is the ideal complement for our cleaning tools system.

In an adequate cleaning system it is essential that the tools are organized properly.

ROLL 'N GRIP™ HOLDER SYSTEM >

System for a proper organization of cleaning tools and guick drying of mops and wet bristles. Its self-adjusting mechanism allows the different handle diameters, it also allows for easier mounting and easier tool assembly and release. It includes a hook for tools that have a hole for hanging storage.

JANITOR CART - 2

CO	DE	PACK
9601B	9601GY	1

Plastic janitor cart designed to organize cleaning tools and garbage collection.

- Easy to clean smooth surface.
- Plasticized canvas bag included.
- Frontal platform allows placing a mop bucket with wringer (Page 15).
- Non-marking rubber wheels.

REPLACEMENT BAG

CODE	PACK

CODE	SIZE	PACK
T00300	12"	10
T00450	18"	10
T00550	22"	10

Pulex® brand squeegee for window cleaning, manufactured with stainless steel and a high-quality rubber blade. These squeegees are the most popular option among professional window cleaners because of their superior performance. After purchasing the squeegee you can buy only the rubber replacement blades, making this a long lasting tool.

Available in 3 lengths (12", 18" and 22").

SQUEEGEE RUBBER REPLACEMENT > 2 2 2

CODE	SIZE	PACK
T03000	12"	50
T04500	18"	50
T05500	22"	50

Rubber blades for Pulex® brand stainless steel squeegees manufactured with 100% natural rubber imported from Malaysia and free of impurities, providing an effective and fast cleaning option for windows that does not leave strips.

The rubber is cut using a process that eliminates the possibility of irregularities.

SQUEEGEE HANDLE 🗻 🙎 🚉

CODE	PACK
T0600	10

If your squeegee's handle is damaged but the channel is still in good condition, it is convenient to only purchase a replacement. You can also buy a handle to use with two different size squeegees.

They can be used with telescopic poles for more security when working at heights, avoiding the use of ladders.

SQUEEGEE CHANNELS > 2 2 2

CODE	SIZE	PACK
T01300	12"	25
T01450	18"	25

We also offer the option of purchasing replacement stainless steel channels in the event that these have been damaged but the blade are still in good condition.

If you need a window-cleaning tool for larger or smaller surfaces, you can simply change the channel for another size and use the handle you already have. This allows you to use two sizes of squeegees with just one handle.

PLASTIC WINDOW SQUEEGEE 🗻 🙎 🚉

CODE	SIZE	PACK
S12030	12"	10
S18045	18"	10

Easy to use, light and cost-effective, these squeegees offer the same performance as those made with stainless steel (since the quality of the rubber is the same) but they are manufactured with a plastic handle and an aluminum channel, making them a price competitive option.

COMBO-SQUEEGEE SA PORTO

CLEANING TOOLS FOR COLOR CODING

HAZARD ANALYSIS AND CRITICAL CONTROL POINTS (HACCP).

This system was created at the early 60's as a tool to ensure food safety. It was originally designed by Pillsbury Co. along with NASA to quarantee that food was safe to be consumed on the first manned space missions, but today its application is essential in most industries.

A requirement to have HACCP certification is to have a Cleaning and Disinfection Plan. This plan must guarantee that the organization's processes of production, warehousing, and transportation are safe, documenting the method and frequency of cleaning, through the implementation of professional color coded cleaning tools to avoid cross contamination.

Even if this method is used mainly in industries where hygiene is extremely important, it is recommended for many other areas, such as: homes, schools, coffee shops, and stores, among others.

THE 7 PRINCIPLES OF HACCP:

- 1. Conduct a hazard analysis. (HA).
- 2. Determine critical control points. (CCP's).
- 3. Establish critical limits.
- 4. Devise a system to monitor critical control points.
- 5. Take corrective actions for out-of-control CCP's.
- 6. Establish procedures to confirm that HACCP system is working effectively.
- 7. Establish documentation about all the appropriate procedures and registries for HACCP principles and application.

Line of brushes for a correct color coding, manufactured with materials recommended by the FDA (Food and Drug Administration), such as PBT fiber, ideal to meet all the requirements for a product that will be in contact with food. The staples that hold the fiber to the block are made of stainless steel to avoid rust contamination. Materials guarantee high durability, making it possible to work with hot water and can be subjected to steam sterilization processes. (except for sanitary brushes).

Symbology: Our line of products includes a wide variety of color coded cleaning tools with as much as 13 different colors. The corresponding letter for each color is added to the general code of the product:

		CÓDIGO												
	BLUE	CREAM	GREEN		BLACK	LIME	ORANGE	PURPLE		RED	BROWN	WHITE	YELLOW	
CASTOR	+B	+C	+G	+GY	+K	+GL	+0	+P	+PK	+R	+T	+\\	+Y	
CFS	14	25	09	23	03	75	24	68	26	05	+01	02	04	

For better identification of the product best suited for your needs, you will find a set of icons representing the specific industry for which the tool is recommended.

FLOOR BRUSHES WITH PLASTIC BLOCK

POLYPROPYLENE 11 SERIES A RELECTION

Brush made of food grade polypropylene fiber and block. Its exclusive design combines the characteristics of a brush for fine, medium and thick powders. The fibers feature an angled cut for fast and effective sweeping on all types of surfaces. Short, stiff fibers on the front sweep up heavy debris. Long and fine/medium fibers on the back sweep up dust and fine particles.

BI-LEVEL BRUSH

1110-BB 1110-BG 1110-BK 1110-BR 1110-BT

10" brush with resistant polypropylene foam block and a "threaded hole with a flow-through design and 1 3/4" stiff polypropylene bristles.

Its two-levels of bristles make it ideal for use in the restaurant industry (industrial kitchen cleaning) since the two levels allow you to easily scrub under furniture and equipment without losing contact angle.

PACI	CODE						
6	1110-MY	1110-MW	1110-MT	1110-MR	1110-MK	1110-MG	1110-MB

Brush made with resistant polypropylene foam block with a 3/4" threaded hole and 1 3/4" stiff polypropylene bristles.

Its block covered with bristles is recommended for scrubbing underneath equipment and many other surfaces such as walls and ceilings. Recommended for use in the restaurant industry (industrial kitchen cleaning); the bristles on both ends of the brush make scrubbing moldings easier.

SHOES CLEANING BRUSHES.

BOOT AND SHOE CLEANING STATION

PIECE		PACK			
COMPLETE STATION	3501B	3501G	3501R	3501Y	1
REPLACEMENT	3502B	3502G	3502R	3502Y	2 PIECES

Manufactured with a steel frame that can be bolted to the floor for safety and convenience, and a pair of brushes made with stiff crimped polypropylene bristles.

This cleaning station is used for shoe cleaning before entering the premises of an industrial facility.

BOOT HAND BRUSH >

	PACK				
4632B	4632G	4632R	4632W	4632Y	4

Brush manufactured with plastic handle with flow thru system and stiff PBT bristles. The guick NPT connect coupling allows for easy connection of standard 1/2" garden hose thread (NPT coupling included). This brush is recommended for boot and shoe washing before entering the different premises in a food industry facility.

MANUAL BRUSH 3203 MODEL SA

	CAJA					
3203B	3203G	3203K	3203R	3203W	3203Y	12

1 3/4" stiff polypropylene bristles. Ideal for aggressive scrubbing. Available in 6 different colors for its use in color-coding programs.

POLYPROPYLENE -

HANDLE	SIZE			CO	DE			PACK
SHORT	8 1/2"	3103B	3103G	3103K	3103R	3103W	3103Y	12

Brush made with very stiff 1 3/4" crimped polypropylene bristles and comfortable block with finger notches. It is recommended for washing pots and pans, plastic containers, tires and rims, and bathrooms, among others. These brushes are manufactured with food grade materials.

OVEN AND GRILL BRUSHES.

SPARTA

BRUSH WITH SPATULA FOR GRILLS

CODE	PACK
4029000	6

Made with heavy-duty metal bristles that remove rust and burnt-on food residue from ovens and grills. Its stainless steel spatula removes debris for a deeper clean.

Block and wooden handle resistant to continuous use in restaurant kitchens. Long (77.47cm) and resistant handle for greater reach.

GRILL BRICK

CODE	PACK
GB12	12

8" x 4" x 3" (20.32 x 10.16 x 8.89 cm) brick recommended for quickly and easily removing residue embedded in griddles and grills without scratching or removing the surface coating. Once the carving is finished, it is necessary to rinse surface to remove debris produced by carving.

The surface of the brick wears away with each use, exposing new abrasive grains, allowing this tool to retain its carving ability throughout its useful life.

SCRATCH

111/2" (29.21 cm) narrow brush. Designed for aggressive scrubbing and cleaning in tight spaces. Its stainless steel bristles are ideal for tougher cleaning jobs, providing fast, aggressive removal of grease and deposits. Its spatula removes debris for deeper cleaning.

LONG HANDLE UTILITY BRUSH FOR HIGH TEMPERATURES

CODE	PACK
4011305	12

20" (50.80 cm) brush with rigid plastic bristles that will not melt or degrade at temperatures up to 260 °C (260 °F). Its Nylon handle resists heat absorption to protect hands during use: the red color, for easy identification, indicates high temperature handling.

Ideal for cleaning griddles in the food industry.

HIGH TEMPERATURE PIPE BRUSHES >

PIECE	CODE	PACK
STRAIGHT BRUSH (1)	4011005	12
LOOPED BRUSH (2)	4011205	6
L-TIPPED BRUSH (3)	4011105	12

Rigid plastic fibers that will not melt or degrade at temperatures up to 260°C. Ideal for the food industry. Its handle (grip) resists heat absorption to protect hands during use. Red color, for easy identification, indicates high temperature handling.

Straight Brush - Designed for cleaning inside pipes, corners and hard to reach areas.

Looped Brush - Its shape is designed for cleaning corners and smaller flat areas.

L-Tipped Brush - Designed for cleaning corners and hard to reach areas.

DRAIN BRUSHES.

DRAIN GRATE REMOVAL ... BREET & BREET

Made of stainless steel with polypropylene handle, 39.50" (100.33 cm) overall length. Convenient and sanitary method for removing floor drain grates. Easy to use: insert into the drain and twist to remove the grate.

Ergonomic handle designed for a secure grip. One-piece construction for easy disinfection.

DIAMETER	CODE	PACK
3"	5301	3
4"	5302	3

This brush is manufactured with polypropylene block with a 3/4" threaded handle hole and black PBT bristles.

It is used to clean drain pipes inside food processing facilities.

8" SWIVEL SCRUB

						CODE							PACK

Mop made with rayon yarn chemically treated with antimicrobial, preventing the spread of bacteria in the mop for its entire life. It is ideal for use where hygiene is of the utmost importance such as hospitals, daycares, and restaurants, among others. (For increased hygiene we recommend that this mop be used with handles 1904-F or 1906-F).

MICROFIBER SOCKET MOPS

CODE						
8002B	8002G	80020	8002P	8002R	8002Y	12

Manufactured with 9 oz. of 100% polyester microfiber, these wet mops have better absorption and dirt retention than cotton wet mops. These features drastically reduce the amount of chemicals and water consumption used for cleaning. Due to its weight, it is very easy to handle and it has the same absorption capability as a 18 oz. cotton wet mop.

The polyester filaments do not allow bacteria proliferation; this is a product that can be used in areas where hygiene is extremely important such as hospitals, daycares, restaurants and food industry among others.

23 GAL TRIMLINE™ CONTAINER > 2.

The best way to save space in work thanks to its slim shape.

It has hooks that help keep garbage bags in place safely so they don't spill and even remove them more easily.

The side handles help stabilize the container while handling it. It has NSF Standard 2 certification that also makes it suitable for organizing and storing food as well as NSF Standard 21 for cleanability.

TRIMLINE™ SWING TOP LID ... BARTON

The rocker cover allows the elimination of waste with hands-free. Fits perfectly with TrimLine [™] 23 gallon waste containers.

TRIMLINE™ RECTANGLE **LID WITH BOTTLE AND** CAN RECEPTACLE

CODE	PACK
342027REC14	4

Lids compatible with our TrimLine™ rectangular containers. Compact design saves space by fitting into tight spaces. Features two perforations for can and bottle collection.

DOLLY TRIMLINE

CODE	PACK
36921003	1

Elegant design dolly. Its ease of movement thanks to its 3" non-marking omnidirectional wheels reduces transport time for emptying. Reduces handling and exposure and restricts access to pests.

PACK

The main characteristic of this microfiber is the mix of microscopic fiber, polyester and polyamide combined to create small like "claws" allowing it to absorb dirt and clean more effectively.

9301B

CODE									PACK	
9110B	9110C	9110G	9110K	91100	9110P	9110R	9110T	9110W	9110Y	6

Manufactured with aluminum covered with electrostatic paint, it is the ideal complement for our cleaning tools system. In an adequate cleaning system it is essential that the tools are organized properly. International regulations demand that in food processing areas, tools should not be in contact with the floor to avoid contamination, also the use of these racks avoid damage caused by bad storage.

ROLL'N GRIP™

	PACK				
9120B	9120G	9120K	9120R	9120Y	12

System for a proper organization of cleaning tools and quick drying of mops and wet bristles. Its self-adjusting mechanism allows the different handle diameters, it also allows for easier mounting and easier tool assembly and release. It includes a hook for tools that have a hole for hanging storage.

Blue, green, red and yellow colors avialable on June.

JANITOR CART

Plastic janitor cart designed to organize cleaning tools and garbage collection.

- Easy to clean smooth surface.
- Plasticized canvas bag included.
- Frontal platform allows placing a mop bucket with wringer (Page 54 y 55).
- Non-marking rubber wheels.

Manufactured with a very soft and perfectly stretched flexible double blade rubber that avoids leaving residual substances in any irregularity that the surface might have.

MASSLIN SYSTEM FOR CLEAN ROOMS

CODE	PACK
W00200	1

21" x 4" trapezoid-shaped microfiber cloth frame with universal handle hole with 4 perforations for quickly attaching cloths. It adapts perfectly to the floor because the bottom part of the frame is made with soft but durable rubber foam.

New presentation without handle.

DOUBLE BUCKET WITH WRINGER

CODE	PACK
IPC01290	1

This double bucket allows separating clean water and dirty water* in different containers making it a very effective tool for highly hygienic cleaning.

It has a down press wringer that can be used with wet mops up to 19 oz. that includes an adapter for flat microfiber wet mops (Page 67) and two trays to carry additional cleaning products.

* Maximum capacity 15 liters each.

OLYMPIC ONE MICROFIBER FRAME

Manufactured with very light and resistant materials that facilitate the use and handling of the base for mopping floors. This 40 cm base has an opening and closing system that allows the operator to remove the dirty microfiber without having to touch it, as well as a mechanism that allows the base to flex in such a way that the microfiber can be squeezed into the bucket with double Deposit.

Recommended for areas where the risk of contamination is medium-high, such as hospital rooms, hotels, restaurants and the food processing industry. Can be used in color-coded areas by simply changing the plastic pieces that hold the microfiber.

HYGIENE MICROFIBER 🗻 🗒 💆

COMPATIBLE PRODUCT	CODE	PACK

TRIGGY	IPC00981	10

Blue microfiber, ideal for cleaning floors. It is very useful for cleaning and disinfecting in medium-high contamination risk areas such as hospital rooms, hotels, restaurants and food industry.

COMPATIBLE PRODUCT	CODE	PACK
OLYMPIC ONE	IPC01101	10
TRIGGY	IPC00982	10

White microfiber with abrasive black dots to remove stubborn stains from the floor. This Microfiber is recommended for medium-high contamination risk areas such as hospital rooms, hotels, restaurants and food industry.

TRIGGY HANDLE & FRAME SYSTEM 🗻 🗒 💆

CODE	PACK
IPC00147	1

Recommended for medium-high contamination risk areas such as hospital rooms, hotels, restaurants and food industry, this product has a tank that distributes cleaning solution directly to the floor while mopping. This feature allows saving water and cleaning solution by releasing just the necessary amount to do the job.

The time invested is also reduced by eliminating the need of rinsing the mop with the wringer.

The frame has Velcro to attach the microfiber so the replacement process is quicker and easier. It is recommended to use a different microfiber to clean each room in order to diminish the risk of contamination.

Strong, light and flexible high-quality squeegees with a high level of hygiene since they are made with FDA approved materials. It is recommended for use in food processing plants, pharmaceutical laboratories, hospitals, restaurants, poultry processing plants, and bottling plants, among others. The "threaded handle hole is suitable for our line of threaded handles.

Current design

The current design is ACME or German threadattached by friction welding. With the new design we have a universal thread directlyinjected which takes ACME, German, Italian and French threaded handles. A wide range of ACME and European threadedhandles tested and approved.

One single product serves most of the world market.

Benefits of the new design with Universal Thread:

- Sturdy design with reinforced structure.
- Differentiation from competitors.
- Less torsion compared to current design.
- Available in different colors and rubber.

ULTRA HYGIENIC FLOOR SQUEEGEES 🗻 🗒 🖫

Plastic one piece single blade squeegee, very easy to clean, manufactured with food grade materials. These squeegees are an excellent option for areas where extreme hygiene is required. It is recommended for food processing plants, pharmaceutical laboratories, hospitals, restaurants, poultry processing plants, and bottling plants, among others.

It has a 3/4" threaded handle hole suitable for our line of threaded handles and it is available in 20 and 24 inches in 5 different colors for color coding programs.

DP19-1500	1500	FINE	19"	2
DP19-3000	3000	VERY FINE	19"	2

Complete maintenance system for concrete and hard-surface floors. Grit size varies: for heavily damaged floors (400); removal of small scratches (800); removal of fine scratches or final polishing (1500); very fine grit (3000) for daily maintenance of your floors and achieving a high shine. With diamond pads it is not necessary to use chemical products; **you can polish your floors using only water**.

Diamond pads are gaining popularity because they are an eco-friendly solution that eliminates the use of chemical products.

27"	FP27-06	5

This pad has a lower amount of natural fiber; it is similar to the white pad. This produces a high shine and can be used in daily polishing programs.

TIGER MODEL CLEANING BONNET 🗻 🔉 🚉

CODE	PACK
BNT-19	2

Carpet cleaning bonnet made with synthetic fibers (does not shed lint) that is highly durable and has looped ends, keeping the thread from wearing out.

It can be used on both sides and is washable.

GREAT WHITE WET MOP - REPUBLIE

CODE	PACK
6615213	1

This product was specifically designed for professional and efficient application of wax. It is made of a yarn that will leave an even and clear coat of wax on your floors. All the wax is efficiently applied on the floor, resulting in savings of more than 30% in the amount of wax used.

SWFFPFR BRUSHFS.

The brushes are perfectly balanced to minimize vibration and guarantee a uniform wear and to reduce the effort of the sweeper. The bristles are anchored with resistant metal clips for excellent retention, will not detach prematurely.

® Tennant is a registered trademark property of Tennant Company.

swing machines.

Standard fiberglass/nylon clutch plate for Clutch plate for Tennant® machines.

Clutch plate for Nilfisk Advance® machines.

STRIP BRUSH are continuous linear brushes, these are manufactured with galvanized steel or stainless steel sheet and fibers of: curly nylon 6, smooth PBT in black, metal filaments* (stainless steel), vegetable* (Tampico fibers), animal* (horse) or mixed*, mounted on a U-shaped profile. The filament is pressed into the base, with no possibility of escape, whatever the type and filament in question.

STRIP BRUSH brushes allow the user a quick adaptation, since the profiles can be cut, bent, drilled or machined. They are supplied in sections of 118", 79" and 49".

If within our standard measurements you do not find the right brush for your process or application, other fibers, diameters and colors can be chosen upon request (natural, metallic and synthetic bristles, etc.).

GUTTER SIZE: #4 #2.5 #7 #10 **FIBER OPTIONS: GUTTER LENGTH:** 118" (299.72 cm) 79" (200.66 cm) 49" (124.46 cm)

FORMS AND STRUCTURES:

STRIP BRUSH brushes are used in a variety of applications, including (but not limited to):

- -Sealing
- Separation and movement of products
- Cleaning of conveyor belts
- Apply pressure to a surface
- Surface cleaning
- Derive static loads
- Remove surface roughness (polished)
- Filter and delimit cleanliness-dirt
- Remove or limit dust
- Pipe cleaning (external or internal faces)
- Cleaning windows, fruits or vegetables

HELICAL

The **STRIP BRUSH** can be manufactured in the form of propellers, these brushes are recommended for cleaning conveyor belts, changing or directing products and glass washing. Helices are formed with the profile for a left or right rotation, depending on the desired orientation.

INNER RING

An inner ring **STRIP BRUSH** is made by forming a strip of metal with the grain on the inside. The ring can be opened or divided into halves or segments to be placed on an axis. Ideal for cleaning exterior surfaces of plastic or metal tubes and rods, or for drum and shaft seals. In high temperature applications, wire filament is recommended.

OUTER RING

Outer rings are single or partial metal backstrip brushes wound with the filament facing outwards. They are used as individual rings or assembled together to form a wide brush face. Used in various cleaning and polishing applications.

CUP-SHAPED BRUSH

These **STRIP BRUSH** are manufactured in a 360 degree circle or single turn segments. The supporting sides can be formed vertically or at various angles. Typically used for a seal for vacuum hoses, dust and particulate collection in drill presses.

CUSTOM STRIP BRUSH

The **STRIP BRUSH** brush can have infinite and irregular shapes and sizes. With an unlimited range of settings, stripe brushes can be formed into ovals, squares, rectangles, "L" and "V" shapes, and compound curves. Manufactured to meet any shape and application.

LINEAR BRUSH

The traditional and common way of manufacturing **STRIP BRUSH**. Brushes are used individually or mounted parallel to a flat or cylindrical surface for a wider brush face. Applications include window, door and dock leveler sealants; conveyor cleaning, splash curtains, lawn sweeping machines, golf course sweeping, static control, glass and printed circuit board cleaning, among others.

CYLINDRICAL OR ROTARY BRUSH

The **STRIP BRUSH** is wound directly onto a shaft, tube or core, forming a roller. The roller can be closed for higher fiber density or open for lower fiber density, depending on the desired characteristics.

BRUSHES FOR CLEANING FOOD PROCESSING EQUIPMENT.

SPARTA

* Any other size or model of this type of brushes can be manufactured on request.

COIL BRUSH -

CODE	PACK
4015000	12

POLYESTER PIPE BRUSHES.

Brush 27.75" (70.48 cm) long and 1.375 (3.49 cm) wide. Polypropylene and polyester fiber handle braided on 9-gauge galvanized wire. Popular for cleaning condensers and machinery in the food industry. The equipment should be cleaned after it has cooled down.

Resistant to maximum temperature of 125°F.

L-TIPPED

CODE	PACK
4015200	12

23" (58.42 cm) long pipe brush. Polypropylene handle and polyester bristles braided on 9-gauge galvanized wire. Its design allows for cleaning the hardest to reach corners.

Resistant to maximum temperature of 125°F.

SPECTRUM® VALVE & FITTING STRAIGHT BRUSH

15" (38.10 cm) length and 1" (2.54 cm) diameter, polypropylene handle. Its rigid polyester fibers are recommended for cleaning straight pipes, elbows, tees and valves.

Communication of the Carlo

Resistant to maximum temperature of 125°F.
