GOOD MANUFACTURING PRACTICES
CERTIFICATE NUMBER GSCGMP-1-121
Based on: NOM-251-SSA1-2009

Low price highly absorbent mop manufactured from a high-quality rayon polyester blend fabric obtained as an industrial sub-product (from the manufacturing processes used for making baby wipes), allowing us to offer a great product at a very low price. In comparison with cotton yarn this material is more absorbent and durable. Additionally, these mops are considered “environmentally friendly” because they are obtained from a double recycling process and are 100% biodegradable. These mops are compatible with our line of threaded handles.
