HI-LO SCRUB BRUSH

10" (25.4 cm) long brush, made of a structural polypropylene block with a 3/4" threaded hole to fix the cane, compatible with any cane with a threaded tip from our line and 1 3/4" yellow rigid polypropylene curly fiber (4.44 cm) in length. It can be used on surfaces (not in the food industry) such as walls, under furniture, among others, without losing contact angle. The most economical option with respect to our Multisurface brush (1110-M) since it is manufactured with a lower cost black block and does not have fiber on the sides.
