## OLYMPIC ONE MICROFIBER FRAME

GOOD MANUFACTURING PRACTICES  
CERTIFICATE NUMBER GSCGMP-1-121  
Based on: NOM-251-SSA1-2009

Manufactured with very light and resistant materials that facilitate the use and handling of the base for mopping floors. This 40 cm base has an opening and closing system that allows the operator to remove the dirty microfiber without having to touch it, as well as a mechanism that allows the base to flex in such a way that the microfiber can be squeezed into the bucket with double Deposit. Recommended for areas where the risk of contamination is medium-high, such as hospital rooms, hotels, restaurants and the food processing industry. Can be used in color-coded areas by simply changing the plastic pieces that hold the microfiber.
